

[Print](#)[Exit](#)**6AR-FSE INTAKE / EXHAUST EXHAUST SYSTEM DETAILS EXHAUST PIPE****CONSTRUCTION**

- a.** The exhaust pipes are made of stainless steel for improved rust resistance.
- b.** A three-way catalyst is used for the front exhaust pipe assembly, helping to reduce emissions.
- c.** A ball joint is used to join the exhaust manifold sub-assembly to the front exhaust pipe assembly, and center exhaust pipe assembly to the tail exhaust pipe assembly. As a result, in-vehicle sound has been muffled, vibration has been minimized, and weight reduction has been achieved.
